UI/UX DESIGNER

Corporate: Downtown Raleigh, North Carolina, USA

1 Glenwood Avenue – Suite 1001, Raleigh, NC 27603

Job Title: UI/UX Designer

Department: IT/Development

Status: Full-time

About Us:

Issuer Direct (NYSE: ISDR) is a global industry-leading communications and compliance platform company focusing on the needs of corporate issuers. Issuer Direct has offices in the UK, Canada and multiple locations across the US, but is headquartered in Downtown Raleigh, NC. Issuer Direct serves more than 4,000 public and private companies in more than 18 countries.

As one of fastest growing companies in our space, we are excited to be recruiting for skilled professionals looking to be a part of our dynamic team!

We're looking for an innovative, organized, and detail-oriented UI/UX Designer to join us. The ideal candidate will be proficient in UI/UX design concepts and have the necessary skills to impact the organization's new application development.

A Day in the Life:

- Implements site design consistent with company goals
- Works in a highly collaborative work environment implementing new features, including day-to-day collaboration with other Engineers and the product, marketing and business development teams
- Collaborates with the business and development staff and other engineers to define and implement innovative solutions for the product direction, visuals and experience
- Contributes in all visual design stages from concept to implementation
- Establishes a future-ready, high quality, and performant code base
- Shares technical solutions and ideas with the team through design review, peer programming, code review and tech talk
- Makes decisions and influences scalable Front-End architecture
- Takes designs, wireframes, and mockups to develop robust User Interfaces
- Troubleshoots issues quickly, tests products, and maintains and updates them through their lifecycle
- Conceptualizes original ideas that bring simplicity and user friendliness to complex design roadblocks
- Conducts usability testing to identify and fix UI issues
- Demonstrates solid experience in creating wireframes, storyboards, user flows, process flows and site maps
- Produces software features as part of a strong team according to Design and User Stories/Specifications
- Makes recommendations which yield an intuitive user interface
- Produces functional mock-ups for developers - UI elements/screens
- Understanding REST architecture and has working knowledge of consuming REST API
- Experience working successfully with local and remote team members
- Experience with Webpack, ES6, Promises, Babel
- Understanding of browser behavior and compatibility
- Experience with cross browser support for the latest browsers

- Experience with CSS preprocessors like SASS
